- Page Fillers

BACKGROUND & PROFILE

Front-end focused full-Stack engineer specializing in building and deploying apps using NextJS with Sanity CMS. I'm inspired by creatively solving problems, experimenting with new technologies, and learning something new every day. I also enjoy refining user experiences. Ich spreche ein bisschen Deutsch.

WORK EXPERIENCE

Schoolhouse / Food52

March 2021 – February 2025

Software Engineer

- Contributed to a brand-new, three-brand monorepo using NextJS with Typescript, Tailwind CSS, and Sanity.io as a CMS.
- Developed and maintained Shopify Theme using Liquid and Javascript, and numerous Shopify APIs.
- Worked closely with marketing team to execute design requests using Sass (and later Tailwind) and BEM, while communicating any limitations of third-party apps.
- Mutated and queried PostgreSQL database tables with both JSON and XML requests
- Created multiple Python scripts for automating tasks for numerous cross-functional partners.
- Spearheaded accessibility compliance within the codebase to meet modern WCAG standards.

Lifetime Optimization Inc.

March 2020 – March 2021

Full-Stack Software Engineer

GOOGLE PLAY // APPLE STORE

- Collaborated remotely with one other dev to launch a mobile app and accompanying web app/backend, playing the role of architect, developer and maintainer. Our app, NMConnect, gives users access to health and wellness resources.
- Developed our Mobile app using React Native with Expo.
- Created an accompanying web app using React, as well as a RESTful API/backend using MongoDB, to give stakeholders access to update app content and send push notifications.
- Helped save a \$1.5 million contract with the State of New Mexico, as well as helping to secure an additional \$200K of funding.

Sykes Enterprises

May 2013 – July 2018

IT Logistics Specialist

- Performed system inspections with detailed inspection notes.
- Helped to reduce preparation and deployment time by organizing the inventory and streamlining workflow for increased productivity.
- Imaged computers for client needs before shipping to employees

ACADEMIC BACKGROUND

Alchemy Code Lab

Full-Stack Software Engineering 2020

Ohio University

BFA in Printmaking 2011
